To Whom It May Concern:

High speed internet would be extremely beneficial to so many individuals and families in our subdivision of Summer Set Lake. With over 300 families living in the subdivision, it does not make sense to me why DSL hasn't already been established. On days that my husband and I are unable to commute to work, we would love to have the opportunity to work from home ~ which is impossible without having high speed internet. DSL is so important to every community, especially with so many people working from home and operating small businesses out of their homes.

Please help make our growing rural community more up-to-date with the time and more desirable to new families.
